

Tommy Tombstone

Description

The driver-side only TV entry module system helps customers load with clean and clear instruction and information. Combined with Tommy's software and controller integration the tombstone loading module allows operators to streamline the loading process, increasing loading speed and minimizing oversight and assistance. Upload custom slides triggered by simple, dry contact outputs from your controller system. Play as many as 6 different slides including "Please Drive Forward" and "Stop Place Car in Neutral".

Specifications

Requires 4 anchor bolts, 110v with 3 amps minimum. The included computer will be located in the office and will need to be wired to the TV in the bay.

Installation

System requires a PC (included) which mounts in a dry office area to control the TV. A computer integration box will require wiring to the wash controller to outputs. 1 output per slide.
