

ICS New Install Site Preparation Requirements

***Change in Policy:** The ICS Pre-Install Department is now **requiring** pictures to be sent instead of a signed checklist in order to confirm the location is properly prepared to complete setup with an ICS technician. *

Please send a return email to info@focusedcarwash.com answering the following questions, with attached required pictures of site. For your convenience the email response will be what we use as a checklist instead of sending back paperwork.

Answer the Following in Return Email: (Required)

- The site has permanent power, internet connection, and water
- The site has had all the paving completed
- The site has completed the application for credit card clearing and it has been sent to the Inside Sales Department for completion
- Certificate of Occupancy (C.O.) is complete and in your possession OR the date that you envision having the C.O.
- The site has tested the wash and is ready to open to the public
- Intended date of opening

Please note that the last day of ICS training should coincide with the day that you plan on opening

The below listed equipment (**if applicable**) must have **pictures** attached to return email, sent to info@focusedcarwash.com Pictures documenting the completed wiring and the equipment mounted correctly is what we are looking for to confirm the install.

Pictures Showing: (Required)

Controller - Mounted & Wired
Keypad - Mounted & Wired
Auto Sentry - Mounted & Wired
